Cladding Systems

Cover profiles provide an innovative appearance on facades

SARAY®

VERTICAL

PROAL

Sistem je pogodan za nove i postojeće objekte i omogućava ventilaciju fasade. Poklopni profili različitih oblika i dimenzija daju fasadi savremen izgled. Sistem se može kombinovati sa drugim aluminijumskim arhitektonskim sistemima SARAY. Montaža je jednostavna i brza. Dostupni su završna obrada u RAL bojama, eloksiranje i dekor drveća. Kombinovanjem profila različitih dimenzija, boja i tekstura arhitekta mogu kreirati raznovrsna fasadna rešenja.

NOVO!

Aluminijumski profili koji se mogu reciklirati omogućavaju izradu održivih fasada. Vertikalne obloge SARAY daju objektima atraktivan izgled.

Thanks to the system, which can also be used in existing structures along with new structures, it is ensured that the facade gets air on the surfaces where the application is made.

Innovative appearance is provided on the facades with cover profiles in different designs and sizes. It can be used together with all other architectural aluminum system solutions of Saray. The application can be made easily and quickly. It gives a different appearance to the facades thanks to painting in the desired RAL colors, anodizing surface treatment and, alternatively, wood effect color options. With the system that allows the use of Decking profiles of different sizes together, independent designs can be created on the facades. Thanks to its different color and texture alternatives, it leads architects in creating the style facade design they want in buildings.

Sustainable facades and structures are brought into use with recyclable aluminum profiles. A rich appearance is provided to the structures with SARAY VERTICAL CLADDING.

SARAY®
Aluminum

SVC 01: Poklopni profil dimenzija 20 × 30 mm. Omogućava elegantan izgled fasade sa vertikalnim linijama.

SVC 02: Poklopni profil dimenzija 40 × 30 mm. Izraženiji profil daje fasadi dodatnu dubinu i savremen izgled.

SVC 03: Šuplji poklopni profil dimenzija 45 × 32 mm. Njegova struktura omogućava različite senke i bogatiji izgled fasade.

SVC01: Cover profile with dimensions of 20 mm x 30 mm: Elegant facade construction with thin vertical lines.

SVC02: Cover profile with dimensions of 40 mm x 30 mm: Gives a new layer to the structure with the dominant profile effect on the facade.

SVC03: Hollow cover profile with dimensions of 45 mm x 32 mm: Thanks to its hollow structure, different shades and a rich appearance on the facade are provided.

TEHNIČKE MOGUĆNOSTI - TECHNICAL PROPERTIES

- Raznovrsne kombinacije RAL boja i dekora.
 - Skriveni elementi za montažu.
 - Jednostavna izrada i montaža.
 - Obloga obavija objekat i daje mu nov izgled.
 - Mogućnost integracije sa vratima i prozorima.
 - Sloboda arhitektonskog oblikovanja.
 - Mogućnost izvođenja ugaonih spojeva.
 - Mala masa smanjuje dodatno opterećenje objekta.
 - Zaštita omotača zgrade od spoljnih uticaja.
 - Primena u eksterijeru i enterijeru.
- Endless kinds of combinations are made with the desired color and pattern.
 - It has hidden mounting details.
 - There are easy manufacturing and assembly details.
 - It wraps the entire structure as a shell, giving a new identity to the structures.
 - Can integrate with doors and windows.
 - Gives architecture freedom in design.
 - Allows angled turns.
 - With its light weight, it does not bring additional load to the structures.
 - Protects the building shell from negative external influences.
 - It can be used indoors as well as outdoors of buildings
